The Medacta **MIS M.U.S.T. LT**, Long Tab screw system, is designed to provide the surgeon with a sleek **minimally invasive solution** for spinal thoracolumbar fixation in **degenerative, deformity, tumor** and **trauma** cases. The low profile screw tulip, the comprehensive screw portfolio as well as the biocompatible **Nickel** and **Cobalt free implants*** make the **M.U.S.T. LT** a smart system to fit surgeons needs for the benefit of their patients.

VERSATILITY IN YOUR MIS SURGERY

* The system is Nickel and Cobalt free if Titanium rods are used.

** For 110mm option please consult your local Medacta representative.
